

Ghana's managed marketplace for dog care.

Live in Accra since June 2026. Vetted caregivers, mobile-money escrow, and a booking record that is already telling us what this market is worth.

Raising US\$100,000 · to take Ghana, then the continent

Adalba Agana-Nsiire · Founder & CEO

DogCare Givers Hub Ltd. · Accra, Ghana · dogcaregh.com

01 The Problem

Why owners are stuck

In Accra, owning a dog means being unable to leave. There is **no reliable, accountable way** to hand your dog to someone else — so care is arranged on WhatsApp, paid in cash, and secured by nothing but hope.

- **No vetting.** The person minding your dog was recommended by a friend of a friend. No background check, no track record, no reviews.
- **No contract, no recourse.** If the dog is neglected, injured or lost, there is nothing to fall back on.
- **Cash up front, on trust.** Money changes hands before service, with no protection on either side.
- **Nowhere to look.** Caregivers are invisible — unlisted, unsearchable, discovered only by referral.
- **The stakes are high.** A trained Shepherd, Malinois or Boerboel represents years of investment and a family member.

“Owners travel for two, three months at a time. They call me because there is genuinely nowhere else to put the dog.”

Adalba Agana-Nsiire — twelve years training dogs in Accra. DogCareGH was built out of the overflow.

02 The Industry Backdrop

A category that consolidates everywhere it matures

The care economy around dogs already exists in every Ghanaian city. It is simply **informal, unlisted and unmeasured** — which is exactly the condition that marketplaces are built to fix.

OWNERSHIP IS CHANGING

From guard duty to household member

Urban middle-class households increasingly keep dogs as companions, not just security. That shift turns a one-off purchase into recurring spend on food, grooming, training and care.

SUPPLY ALREADY EXISTS

Groomers, sitters, kennel hands, trainers

Hundreds of people across Accra already do this work for money. None of them are bookable online, none of them have a rating, and none of them can be found by a stranger.

NOBODY HOLDS THE DEMAND

The market has no record of itself

No register of who owns dogs, where they live, which breeds, or what they spend. Every business serving this market is guessing — including the vets, the shops and the breeders. On our own bottom-up count, Accra alone holds a reachable base of **5,000+ dog owners**.

03 The Solution

Managed, not merely listed

DogCareGH is a **managed marketplace**: we verify the caregiver, set the structure of the service, hold the money in escrow, and stand behind the booking. The owner books a platform, not a stranger.

01

Overnight Care

Multi-night stays in a vetted caregiver's home. The revenue engine.

02

Dog Sitting

In-home care while the owner is away for the day or the week.

03

Doggy Daycare

Daytime supervision for owners who work outside the home.

04

Mobile Grooming

Groomer comes to the door. An established spending habit already.

05

Dog Walking

Scheduled exercise. The habit-forming, highest-frequency service.

Verified supply

Identity, home inspection and reference checks before a caregiver can accept a booking.

Money held in escrow

Paystack MoMo and card. The owner pays the platform; the caregiver is released on completion.

Accountability built in

In-app messaging, photo updates, dog profiles and two-way reviews on every booking.

25% take rate

Charged on completed bookings only. Live and collecting since day one.

04 How It Works

Booking to payout

Five steps, all of them live in production today at dogcaregh.com — not a prototype, not a waitlist.

1 Owner searches by neighbourhood

35+ Accra neighbourhoods mapped. Caregivers ranked by locality, service, verification status and rating.

2 Booking request & agreement

Dates, dog profile, service type and price are fixed in the app before anyone commits. The caregiver accepts or declines.

3 Payment into escrow

Mobile money or card through Paystack. Funds sit with the platform — the owner is protected, the caregiver knows the money is real.

4 Care delivered, with a paper trail

Photo updates and in-app messaging throughout. On long overnight stays a deposit is released to the caregiver up front.

5 Completion, payout, review

Balance released on completion. Platform retains 25%. Both sides review each other, and the record compounds.

THE POINT

Every booking makes the next one easier to win

Ratings, repeat pairs, neighbourhood coverage and price data all accumulate on the platform. That record is the asset.

AVERAGE RATING

21 reviews · zero disputes

Eleven weeks from launch. **No sales team, no paid growth engine, no discounting** — this is organic demand meeting a platform that finally exists.

Figures taken directly from the DogCareGH production database, 31 August 2026. Cancelled bookings (13, GH¢11,635) are excluded from all value and earnings figures throughout this deck.

06 What The Data Says

Reading the ledger honestly

- **Overnight care is the engine.** It dominates the ledger by value, with individual bookings running from GH¢220 to GH¢3,600. High ticket, long duration, high switching cost.
- **Repeat behaviour is already visible.** One owner has booked four times with the same caregiver; two more are on their third booking. Retention is showing up before we have spent a cedi on it.
- **Grooming converts fastest.** It is an existing spending habit, so it needs no behaviour change — the cheapest door into the platform.
- **Perfect service record.** 5.00 across 21 reviews, no disputes, no payout failures.
- **Supply is not the bottleneck.** 79 providers signed up against 43 bookings. We need demand, not caregivers — which is precisely what this raise buys.

THE HONEST NUMBER

30.2% of bookings cancelled

We show every cancellation rather than hiding it. Read one by one, the pattern is mostly **rescheduling on long overnight stays** — a GH¢1,440 booking cancelled on 6 July and completed on 8 July; a GH¢720 stay rebooked at GH¢660 two days later. Fix in progress: a confirmation deposit on overnight bookings, with date changes handled as amendments.

FULL DISCLOSURE

Founder-account bookings

Seven completed bookings totalling GH¢1,048 were placed on the founder's own account while testing live flows. Excluding them entirely, **GH¢18,312 of completed value came from paying third-party customers.**

WHAT IT ADDS UP TO

Sixteen customer bookings in eleven weeks

Zero disputes, zero payout failures, no marketing spend, no sales team. That is the base this raise multiplies.

07 Unit Economics

Where the money goes on a GH¢1,000 booking

GH¢1,000

BOOKING VALUE

actual average to date: GH¢842

GH¢750

TO THE CAREGIVER

75% · released on completion

GH¢250

PLATFORM COMMISSION

25% take rate

~GH¢230

NET CONTRIBUTION

after ~GH¢20 payment fees

No cost of goods, no fleet, no rent

The caregiver supplies the capacity, the space and the labour. The platform supplies demand, trust and payment rails. Gross margin on commission is close to whole.

Escrow removes credit risk

We are paid before the service is delivered, and we pay the caregiver after. The platform never carries a receivable and never funds working capital for a booking.

Marginal cost of a new city is software

Launching Kumasi does not mean building Kumasi. It means recruiting caregivers into a system that already exists, then spending on demand.

Payment processing estimated at approximately 2% of booking value on Pystack mobile money and card collections. Commission is charged on completed bookings only — cancelled bookings earn nothing.

08 Why This Works Here

Four things a foreign entrant cannot copy quickly

PAYMENTS

Mobile money is the default, and it is already wired

Paystack MoMo and card collections are approved, live and processing real bookings with escrow. Global pet-care platforms have no mobile-money rail and no reason to build one for this market.

TRUST

Verification is the product, not a feature

In a market where the alternative is handing your dog to an unvetted stranger, the checks, the escrow and the review history are the entire reason to use us rather than WhatsApp.

SUPPLY

The founder is inside the industry

Twelve years as a professional K9 trainer in Accra. The caregivers, breeders, groomers and owners on this platform are a network built since 2014, not a cold-start acquisition problem.

DENSITY

Care is a neighbourhood business

35+ Accra neighbourhoods mapped, with matching by locality. Density in a corridor is worth more than thin coverage across a city — and it is how we will enter every new market.

09 The Data Advantage

The asset that outlasts the bookings

Nobody can currently tell you how many dogs are in Accra, what their owners spend, or where they live. **DogCareGH is building the first structured record of the Ghanaian dog market** — and every booking makes it sharper.

100

DOGS PROFILED

43

PRICED TRANSACTIONS
real willingness to pay

5

SERVICES BENCHMARKED
demand by category

It prices the market

Real transaction values by service, breed and neighbourhood replace guesswork for everyone operating in this industry.

It targets the spend

We market to households we know own dogs, in corridors we know convert, at price points we know clear.

It compounds into the next city

Every launch starts with a validated playbook: which service opens the market, what it should cost, how many caregivers per neighbourhood.

10 The Scale Plan

Ghana first, then the continent's dog-owning cities

Accra alone supports **5,000+ registered dog owners**. Every city on this list is at least that size, and most are several times larger — which is why coverage, not saturation, is the growth constraint.

YEAR 1 – 2

Ghana national

Kumasi · Takoradi

Take Accra from 2,000 owners toward its own 5,000+ ceiling, then replicate into Ghana's next two urban markets on the same caregiver-recruitment and neighbourhood-density playbook.

YEAR 2 – 3

Eight African cities

Abidjan · Lagos · Abuja · Dakar · Kampala ·
Nairobi · Johannesburg · Pretoria

West, East and Southern Africa in one wave. Every one of these cities has a large dog-owning middle class, mobile-money rails and no managed care platform.

YEAR 4 – 5

Continental

Every other major African city

By this point the model is proven across three regions and five currencies. Expansion becomes a repeatable launch process funded by the cities already running.

Same broken market

Informal, referral-only care in every one of these cities.

Same payment rails

Mobile money is the dominant consumer rail across all target markets.

Same software

One multi-city codebase. A launch is a configuration, not a rebuild.

No incumbent

No managed dog-care marketplace operates at scale anywhere on the continent.

11 Ten-Year Projection

All values in GH¢ unless marked

Years 1 and 2 are our own operating targets (highlighted). Everything after is driven by two things only: **how many cities are live** and **how often a registered owner books**. Accra alone supports 5,000+ owners, so Year 1 targets under half of a single city.

YEAR	MARKETS ADDED	CITIES	DOG OWNERS	OWNERS / CITY	BOOK RATE	BOOKINGS / MO	GMV / MO	COMM. / YR	≈ US\$ / YR
Year 1	Accra	1	2,000	2,000	5.0%	100	100K	300K	\$27K
Year 2	+ Kumasi, Takoradi	3	5,000	1,667	5.0%	250	250K	750K	\$66K
Year 3	+ 8 cities: West, East & Southern Africa	11	14,000	1,273	5.5%	770	770K	2.31M	\$204K
Year 4	+ 4 major African cities	15	30,000	2,000	6.0%	1,800	1.80M	5.40M	\$478K
Year 5	+ 4 major African cities	19	55,000	2,895	6.5%	3,575	3.58M	10.72M	\$949K
Year 6	+ 5 major African cities	24	90,000	3,750	7.0%	6,300	6.30M	18.90M	\$1.67M
Year 7	+ 5 major African cities	29	130,000	4,483	7.5%	9,750	9.75M	29.25M	\$2.59M
Year 8	+ 5 major African cities	34	175,000	5,147	8.0%	14,000	14.00M	42.00M	\$3.72M
Year 9	+ 4 major African cities	38	220,000	5,789	8.5%	18,700	18.70M	56.10M	\$4.96M
Year 10	+ 4 major African cities	42	270,000	6,429	9.0%	24,300	24.30M	72.90M	\$6.45M

Modelling assumptions: owner growth tracks city coverage, reaching an average of roughly 6,400 registered owners per city by Year 10 — a figure Accra alone already supports. Monthly booking rate rises from 5% of registered owners (the Year 1 and Year 2 rate) to 9% by Year 10 as walking, grooming and daycare become recurring rather than occasional. Average booking value held flat at GH¢1,000 (actual average to date GH¢842) and take rate held at 25% throughout — neither is assumed to improve. Cedi-denominated with no inflation or FX adjustment applied; USD at an indicative GH¢11.3 = US\$1 (August 2026). Projections are forward-looking estimates, not guarantees.

13 The Competitive Picture

What an owner does today instead

ALTERNATIVE	WHAT IT OFFERS	WHERE IT FAILS THE OWNER
A friend, relative or the security man	Free or cheap, familiar	No vetting, no reliability, no recourse — and the favour runs out
Informal sitters found by referral	Genuine skill, sometimes excellent	Unfindable, unverified, cash-only, no accountability if it goes wrong
Kennels and boarding facilities	Structured, physical premises	Few of them, capacity-capped, capital-heavy, no in-home option
Rover, Wag and global platforms	Mature product, huge scale	Not present in Africa. No mobile money, no local verification, no local supply
Vacay Sitters (Cape Town)	Closest continental comparable	Single market, single country, no West or East African presence

OUR POSITION

First mover with a live payment rail

Managed marketplace, escrowed mobile money, verified caregivers — already transacting.

The real competitor is the status quo

We are not fighting another app. We are converting an informal habit into a booked, paid, reviewed transaction.

The window is open now

No African incumbent has taken this category. Whoever holds the supply and the data first will be very hard to unseat.

14 The Ask

US\$100,000 · ≈ GH¢1.13M

We have proven that people will book and pay. We are raising **US\$100,000** to buy demand at scale in Accra, prove repeatable unit economics, and open Kumasi and Takoradi.

USE OF FUNDS	SHARE	US\$
Marketing & demand generation	35%	\$35,000
Caregiver supply & new-city launches	25%	\$25,000
Product & engineering	20%	\$20,000
Operations, trust & safety	12%	\$12,000
Legal, compliance & working capital	8%	\$8,000

Indicative conversion at GH¢11.3 = US\$1, August 2026.

STRUCTURE

Convertible note

Instrument, valuation cap and discount to be agreed with the lead investor, executed under Ghana's Companies Act 2019 (Act 992) with Ghanaian counsel. The cap table is clean: the founder holds essentially all of the company, with no legacy investor overhang.

RUNWAY

18 months to a priced round

Enough to hit the Year 1 targets, open two additional Ghanaian cities, and go into a Series Seed with real multi-city revenue rather than a story.

WHY NOW

Supply is ready, demand is starved

79 caregivers are already signed up against 43 bookings. Every cedi of this raise goes into the side of the marketplace that is actually short.

15 What The Money Buys

18-month milestones

MONTHS 1 – 6

Own Accra

2,000 registered dog owners — under half of what Accra alone supports. 100 bookings a month, GH¢100,000 monthly marketplace volume, cancellation rate below 12% with confirmation deposits live.

MONTHS 7 – 12

Prove repeatability

Kumasi opened with 40+ verified caregivers. Repeat-booking rate and acquisition cost measured and stable. Mobile apps in both stores.

MONTHS 13 – 18

Second city, then the case

Takoradi live. 5,000 owners across three cities, 250 bookings a month, GH¢62,500 monthly commission — the Year 2 target, evidenced across multiple markets.

Demand engine

Paid acquisition in Accra's dog-owning corridors, vet and pet-shop referral partnerships, and content that reaches owners where they already are.

Trust infrastructure

Deeper caregiver verification, insurance-backed booking protection, and a formal incident process.

Product

Native mobile apps, multi-city support, check-in/check-out with photo logging, and caregiver earnings tooling.

Compliance

Data Protection Commission registration completed, trademark filings lodged, and multi-market payment structuring.

16 Founder & Company

Who is doing this

Adalba Agana-Nsiire — Founder & CEO

- **Professional K9 trainer in Accra since 2014.** Twelve years of in-home clients, breeders, groomers and kennel operators — the exact network this marketplace runs on.
- **The product came out of the problem.** DogCareGH exists because demand for overnight care exceeded what one trainer could physically absorb.
- **Operating the platform daily.** Caregiver onboarding, booking oversight, payouts and customer communication are all run hands-on, which is why the ledger is clean enough to show you.
- **Built in-house.** The entire platform — bookings, escrow, messaging, reviews, admin — was shipped without outsourced development cost.

THE COMPANY

DogCare Givers Hub Ltd.

Incorporated 6 July 2026 under Ghana's Companies Act 2019 (Act 992) as a company limited by shares. Registration No. CS141020726. DogCareGH is the marketplace brand operating under it.

STACK

Next.js · Supabase · Paystack · Vercel

Modern, low-overhead infrastructure with escrowed MoMo and card collections approved and live.

STANDING

Compliance in motion

Paystack due diligence cleared. D&B DUNS registered. Data Protection Commission registration and trademark filings are in progress and funded by this round.

The dogs are already here. The caregivers are already here. Now there is a platform.

US\$100,000 to turn eleven weeks of proof into Ghana's category leader — and the first managed dog-care marketplace on the continent.
